CAREER OBJECTIVE

Android Developer with hands-on experience in Java, Kotlin (basics), Firebase, and API integration, seeking to build scalable, user-centric mobile applications while growing in AI-driven and modern Android technologies.

EDUCATION

Khwaja Moinuddin Chishti Language University. **Lucknow, U.P., India.**

Bachelor of Technology in Computer Science in progress. *Graduation Date: June 2026*

SGPA: 7.46

TECHNICAL SKILLS

- **Languages:** Java, Kotlin (Basics), XML, C, C++, HTML, CSS, JavaScript
- **Android:** Android Studio, Activity Lifecycle, RecyclerView, Firebase, REST APIs
- **Backend & DB:** MySQL (XAMPP), Firebase Realtime DB
- **AI & Tools:** Generative AI APIs, Postman, Git/GitHub, VS Code
- **Design:** Canva, MS Office

EXPERIENCE

Tata Consultancy Services (TCS) – Intern, GenAI & Android Development (*Aug 2025 – Oct 2025)*

- Built **MindNest**, an AI-powered Android mental wellness app using Java, XML, Firebase, and GenAI APIs.
- Implemented AI-driven responses, journaling, and empathetic UI flows following Agile practices.

Krunatics (Remote) – Intern, Android Development (*Jul 2025 – Aug 2025)*

- Developed **FlashFeed** (news app) and **Vion** (utility app) using Java, XML, Firebase, and REST APIs.
- Worked on RecyclerView, UI optimization, and debugging in a remote team setup.

Techpile Technologies Pvt. Ltd. – Android Development Training (*Jul 2024 – Sep 2024)*

- Built **Chit-Chat**, a static chat app with Firebase-based messaging and real-time data storage.

PROJECTS

Pulse-Pheno (Minor Project)

- Developed an AI-based Android application to analyze pulse images and automate quality grading using computer vision techniques.

- Implemented a rule-based classification system to categorize pulses into quality grades, reducing manual inspection bias.

MindNest (AI Mental Health Companion App) – ***Tata Consultancy Services (TCS), Lucknow***

- Built an Android mental wellness app supporting journaling and AI-powered supportive responses using Java, XML, Firebase, and APIs.
- Designed intuitive UI flows and managed real-time data storage for user entries and emotional insights.

FlashFeed (News Aggregator App) – ***Krunatics, Bengaluru (Remote)***

- Developed a news aggregator Android app that fetches and displays live news using REST APIs and JSON parsing.
- Implemented RecyclerView and CardView for smooth scrolling and dynamic content presentation.

Vion (Utility Companion App) – ***Krunatics, Bengaluru (Remote)***

- Created a utility Android application providing features such as note-taking and reminders with Firebase-backed storage.
- Focused on responsive UI design and activity lifecycle management to ensure consistent app performance.

Chit-Chat (Static Chatting App) – ***Techpile Technologies Pvt. Ltd., Lucknow***

- Built a static Android chat application using Java, XML, and Firebase Realtime Database.
- Implemented core messaging functionality with real-time data synchronization and chat history storage.

RESEARCH & ABSTRACT

- **Android-Based Bike First Responder Network** *(Under Review)*
  Proposed an AI-dispatched emergency response system achieving **50–70% faster response time** in simulations.
- **Pulse-Pheno: AI-Based Seed Phenotyping System** *(Under Review)*
  Co-authored research on AI-powered pulse classification using smartphone imaging and computer vision.

LEADERSHIP & ACTIVITIES

- **Treasurer**, SHE NGO– Managed budgets and social initiatives
- **NSS Volunteer**– Campus cleanliness & community programs
